**OZONE INSURIA™**

easy to use insurance broking management software

# Ozone Insuria

**Ozone Insuria** - easy to use insurance broking management software designed and developed at par with business specific demands of the insurance brokers / agents. The key highlight of **Ozone Insuria** is incorporating day-to-day operations with seamless integration into the accounting module. Information on demand is the base foundation on which **Ozone Insuria** is developed. Being a web based application, **Ozone Insuria** helps to analyze your business any time any where in the globe.

## HIGHLIGHTS

- ✔ **Easy to use interface** : Ozone Insuria helps to manage the clients, policies and finance very easy. Our search filters are very powerful in getting information(s) on policies and customer related information at your finger tips.
- ✔ **User free licensing concept** : Bundled as a single server license, incorporating unlimited users.
- ✔ **Strong information access restriction policies** : System admin can specify strong access policies on user information access as to what pages can be accessed and what level of information can be accessed. This can be restricted to user as well as branch level information access.
- ✔ **Manage business from all branches under one roof** : Management can now manage and monitor business from all branches / locations from one place helping in business analytics / evaluation very easily.
- ✔ **Robust MIS reports** : Ozone Insuria has various MIS reports on business and finance, which helps the core management team in evaluating the business performance to the minute level.
- ✔ **Debt collection and credit management made easy** : Ozone Insuria's aging analysis reports give a detailed insight into what is the outstanding from customers and what is being owed to the insurance companies. A detailed receivable statement generated from the system helps in your debt control and payable statement generated helps to keep a tab on the outstanding with insurance companies.
- ✔ **Operations/process fully integrated with finance module** : All the process and operations (policy registration, renewal and endorsement) is directly integrated into the finance module. The process related invoices are auto generated helping finance department in managing the receipts and payments seamlessly.
